Machine vs Human

Computer Vision in Four Words?

Making computers understand images

How simple is that?

中华人民共和国万岁

世界人民大团结万岁

Computer Vision in Four Words?

:: Making computers understand images

- How many **people** are here?
- Who is a **person in the portrait**?
- What is this **building**?
- How is the **weather**?
- Where is **this city**?
- What is **written**?
- Is there any **gate**?

Computer Vision in Four Words?

:: Making computers understand images

- How many **people** are here? → Object **detection**
- Who is a **person in the portrait**? → Face **detection/recognition**
- What is this **building**? → Object **recognition**
- How is the **weather**? → Scene **recognition**
- Where is **this city**? → Place **recognition**
- What is **written**? → Character **recognition**
- Is there any **gate**? → Object **detection**

What is vision?

- What does it mean, to see? *"to know what is where by looking"*.
- How to discover from images what is present in the world, where things are, what actions are taking place.
- "Vision can be understood as an information processing task which converts a numerical image representation into a symbolic shape-oriented representation."

Why is vision so hard?

- 3D: Viewpoint

Why is vision so hard?

- 3D: Viewpoint

Why is vision so hard?

- Light

Why is vision so hard?

- Shadow

Why is vision so hard?

- What is this object?

Why is vision so hard?

- What is this object?

Why is vision so hard?

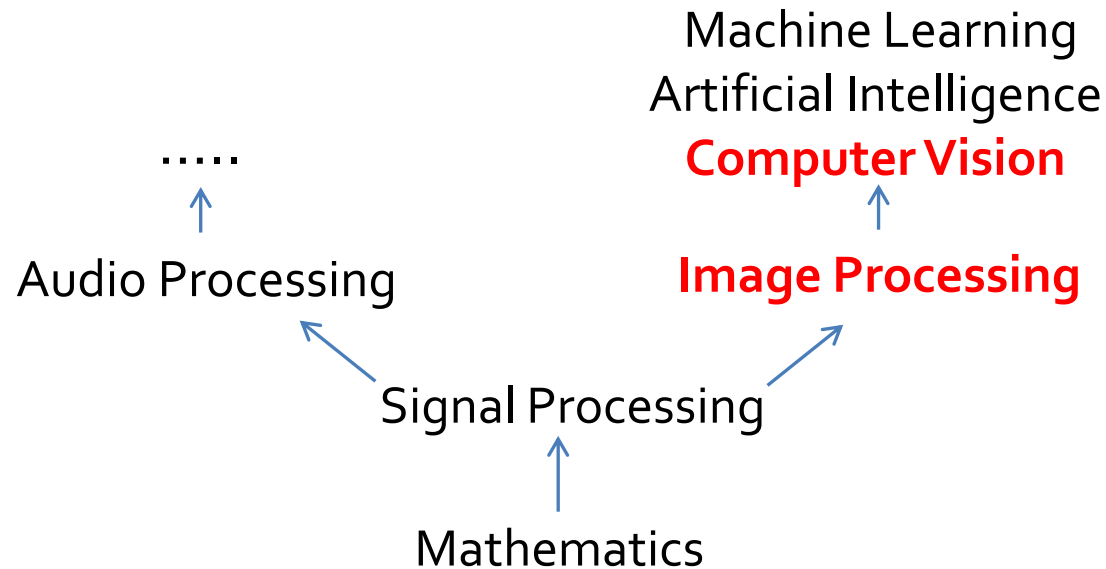

- What is this object?

It is not just about pixels!

Computer Vision and Image Processing?

- Computer Vision begins with Image Processing!

- **Computer Vision:** techniques for enabling a computer to see a real-world using images as the human being does.
- **Image Processing:** fundamental techniques for image acquisition, processing, analysis

Computer Vision and EBUxxxx?

Computer Vision: Low-level Vision

Low-level vision

- Enhancement
- Restoration
- Filtering
- Feature extraction

Mid-level vision

- Fitting
- Grouping
- 3D geometry
- 3D reconstruction
- Tracking

High-level vision

- Classification
- Detection
- Tracking
- Action & Pose

Computer Vision: Mid-level Vision

Why computer vision matters?

Safety

Health

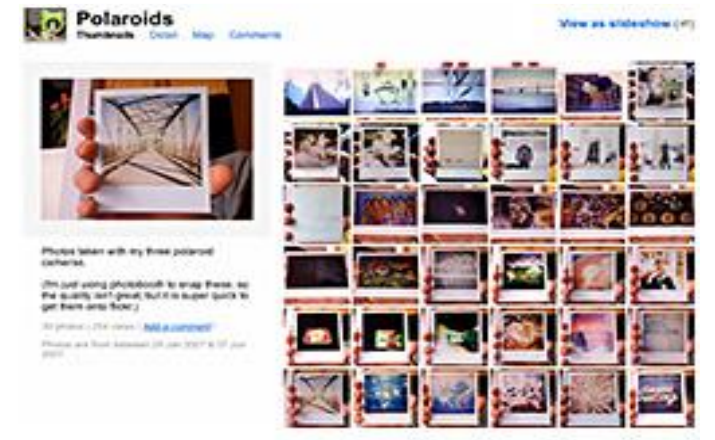

Security

Comfort

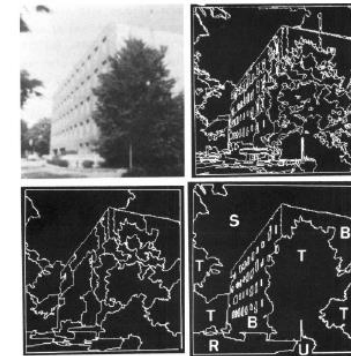

Fun

Access

Ridiculously brief history of computer vision

- 1966: Minsky assigns computer vision as an undergrad summer project
- 1960's: interpretation of synthetic worlds
- 1970's: some progress on interpreting selected images
- 1980's: ANNs come and go; shift toward geometry and increased mathematical rigor
- 1990's: face recognition; statistical analysis in vogue
- 2000's: broader recognition; large annotated datasets available; video processing starts
- 2010's: Deep learning with ConvNets
- 2020's: Widespread autonomous vehicles?
- 2030's: robot uprising?

Slide credit: J. Hays

Applications – Motion capture

Applications – Face recognition

How the Afghan Girl was Identified by Her Iris Patterns

Applications – Face Alignment

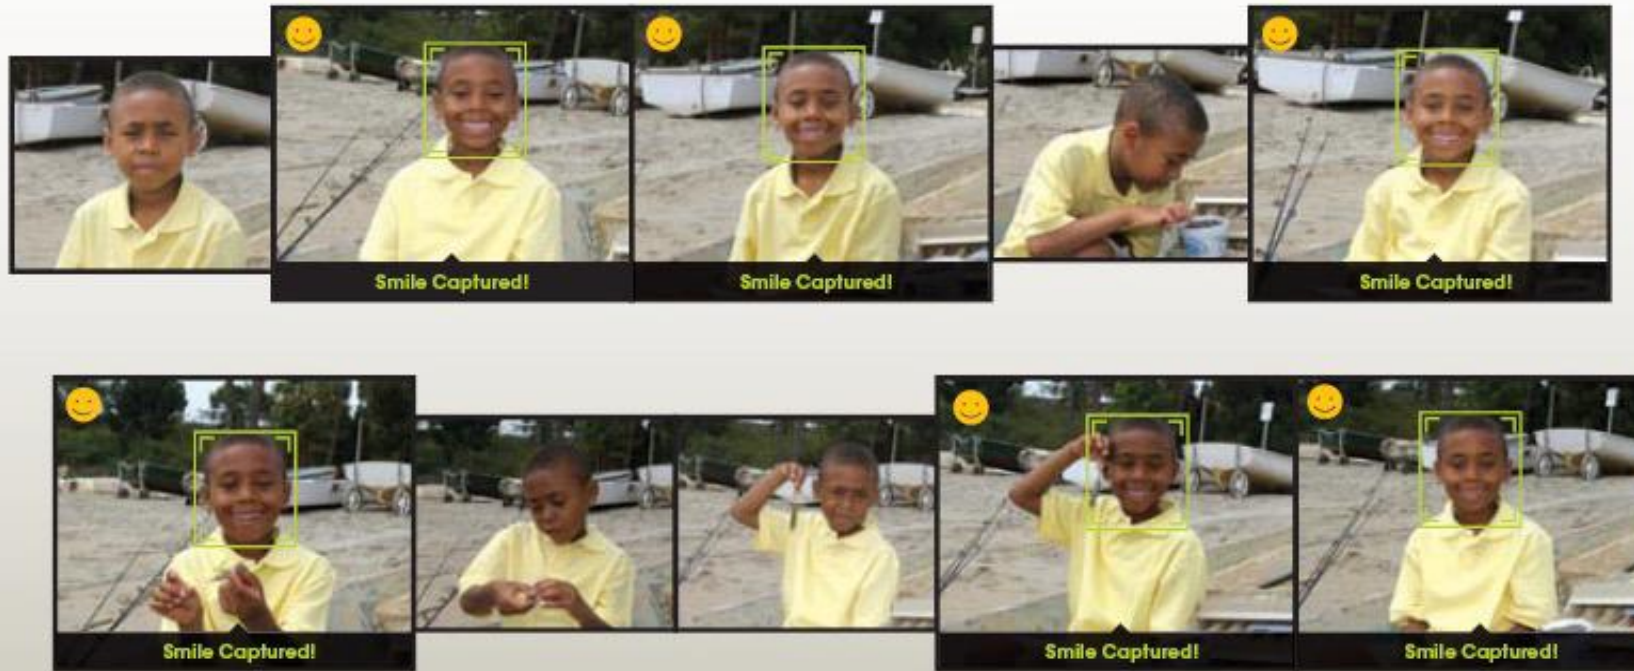

<https://www.maccosmetics.co.uk/virtual-try-on>

<http://jbhuango604.blogspot.com/2013/04/miss-korea-2013-contestants-face.html>

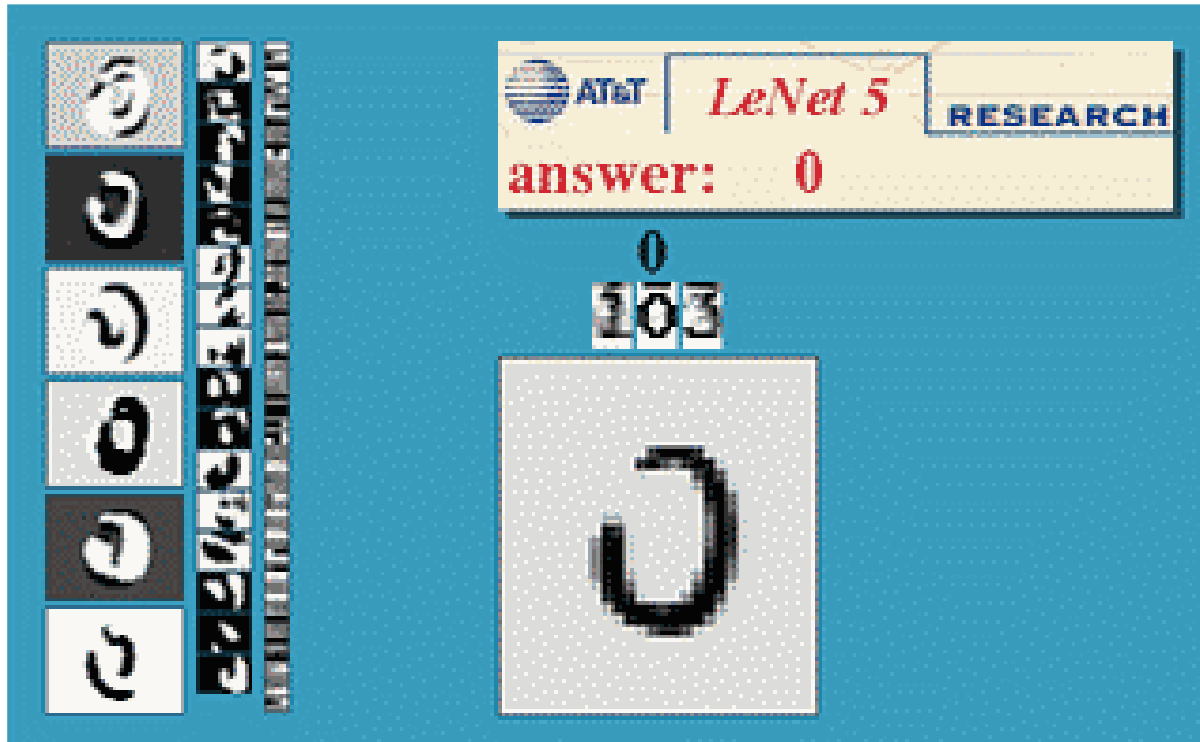

Applications – Smile detection

The Smile Shutter flow

Imagine a camera smart enough to catch every smile! In Smile Shutter Mode, your Cyber-shot® camera can automatically trip the shutter at just the right instant to catch the perfect expression.

Applications – Optical character recognition (OCR)

Applications – Defect detection

Applications – Cleaning robot

Applications – Sports

<https://newsroom.intel.com/chip-shots/intel-replay-technology-delivers-all-star-experience-for-mlb-fans/#gs.fi3kzq>

Applications – Object recognition

Applications – 3D from mobile phone

Applications – Indoor scene reconstruction

Applications – Video Matting/Composition

<https://youtu.be/63vqob-MljQ>

Applications – Style Transfer

Source image (**Style**)

Target image (**Content**)

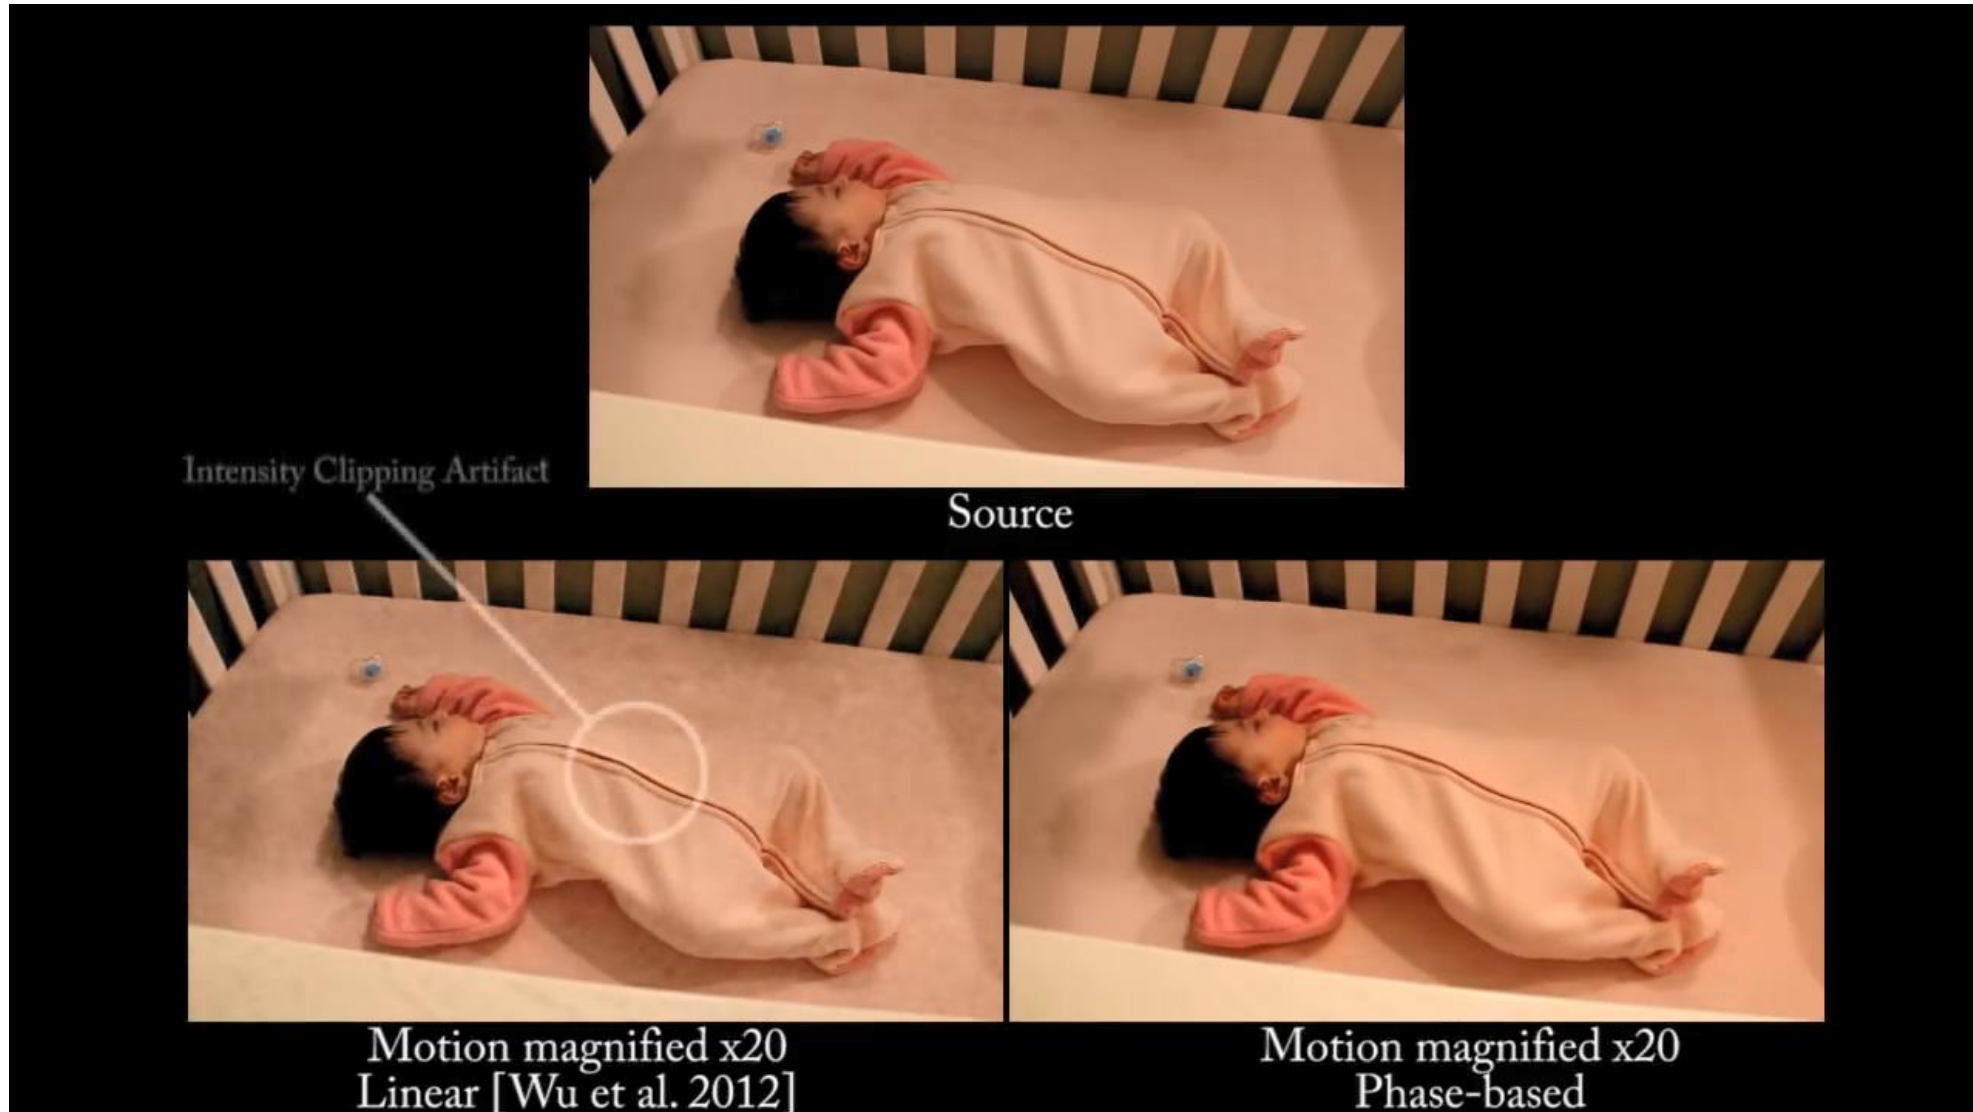

Output ([deepart](#))

A Neural Algorithm of Artistic Style [Gatys et al. 2015]

Applications – Self-driving cars

Applications – Healthcare

Why is computer vision timely?

- Lots of image data is being collected

Why is computer vision timely?

- Lots of image data is being collected
 - Bigger data is coming

Why is computer vision timely?

- There is a lot of information in images

Why is computer vision timely?

- Computer vision is starting to work ...
